

Electricity InfoCard 2002

Energy Information Administration

(Side One)

U.S. Electric Power Industry Emissions

	1992	1997	2002
	<u>(Thousand Metric Tons)</u>		
Carbon Dioxide	1,865,680	2,123,263	2,313,294
Sulfur Dioxide	14,337	12,484	9,933
Nitrogen Oxides	6,717	6,085	4,668

(Side Two)

U.S. Electric Power Industry Consumption & Cost of Fossil Fuels for Electricity Generation, 2002

	Consumption	Cost (cents/million Btu)
COAL (thousand tons)	987,583	125.5
PETROLEUM (thousand barrels)	168,597	334.3
NATURAL GAS (million cubic feet)	6,126,062	356.0

Percent of U. S. Electricity Sales (Bundled and Unbundled) by Class of Consumer with Average Retail Price, 2002

Average = 7.21 cents/kWh
